

Bista solutions automated an integrated ERP for All4Cellular

OpenERP official US and Asia partners Bista solutions implemented a full fledged Open source Business software integrated with the eCommerce eBay & Amazon stores for a US based Company All4Cellular

All4Cellular based in **US** is a one stop shop for cell phone accessories. It provides a largest range of discounted cellular accessories with affordable pricing.

Shaya Posner, Managing Director of All4Cellular said –

“Our online accessories business was growing with the sales on multiple online stores such as on eBay and Amazon, so we needed a solution that can capture all our business in one single software. Bista solutions helped us in providing a cost effective web based ERP software which was integrated with various channels. He added With this implementation we can now easily check from one tool on what

Business Development Head of Bista solutions Shahid Bandarkar, explained –

“This project of All4Cellular have provided us with one of the best experiences in OpenERP implementation as we have opened a path in the tool where you get other integrations such as shipping services, and online platform integrations which was previously not available in the community”.

“This implementation provide the client with a wholesome ERP software with no future cost being open source”.

Bista solutions helped us in providing a cost effective web based ERP software which was integrated with various channels.

Shaya Posner,

Managing Director

Products :

OpenERP

Integrations :

- > Magento Website
- > eBay.com
- > Amazon.com

Other integrations :

- > UPS
- > Endicia
- > FedEx

Customer : Sector :

- > Telecom Accessories
- > eCommerce

Enterprise Modules :

- > Sales Management
- > Purchase management
- > Ware house
- > Accounting
- > After Sales Service
- > Multi - Company
- > Multi - Currency

Challenges :

- Separate Inventory management and shipping tool which was not integrated with these online platforms.
- Delay in shipment was leading to upset the customer and the Shipping tool was non-scalable in-terms of volume of business.
- No single system which could provide a 360 degree view and control of the business process of the company.
- Another challenge was maintaining separate accounting system called as Quick books which was leading to manual data entries leading to errors.

Key Implementation Features :

- Integration of 3 Magento Stores, 3 eBay stores and 3 Amazon.com stores
- Capable to handle high volume eCommerce vendor selling on multiple platforms.
- The website perform 4000 order processing at an average from the ERP on daily basis.
- Implementation of batch processing logic for orders integrated with the weighing scale.
- Shipping Carriers such as Endicia (USPS), UPS & Fedex; with shipping labels generation, pricing, tracking number

The Result:

The implementation helped in having a single login to manage all the sales, purchase, Inventory, Accounting, shipping, Magento and other stores.

- It allowed to process more orders and paving the way for future growth after the streamline in Shipping Carriers integration.
- Reduction in instance of wrong-shipment with automatically detecting the package weight.
- All the common products and inventories can be maintained for all the online selling Channels.
