TURBO

ENTERPRISE SOLUTIONS FOR AUTOMOTIVE & AUTOPARTS

One Stop Solution to manage

Manufacturing · **CRM** · **Supply Chain** · **POS** · **Inventory** · **Aftermarket & Services**

Overview

Technology-driven trends will revolutionize how industry players respond to changing consumer behaviour, develop partnerships, and drive transformational change. Automotive manufacturers and their partners are facing radical changes to their businesses with the emergence of new digital technology and the redistribution of global supply chains. Gasoline to electric engines, user/driver features to self-driven automobiles (smart cars) and so on. Continuous research & development which has been carried out to support these changes is greater than ever before. Regardless of your place in automotive value chain auto manufacturers, distributors and aftermarket must be responsive to these changes. Globalization and operations necessitate a solution that can handle multiple brands, locations and currencies. Only a next-generation enterprise solution, one that is more scalable and seamlessly integrates systems, can address these challenges.

- Is it challenging to manage your customers as well as your inventory?

- Do you have a well-built system to manage your production quality and supply chain management?

- Do you have detailed insights of which parts are in highest demand in your region?

- Do you have online real time data available that enables full traceability?

- Is your legacy system well integrated with the latest accounting softwares to manage your finances in time?

Bista's TURBO Enterprise Solutions can help you overcome these challenges and realize benefits immediately...
